Cybershape Carbon CWT Truls Edition

Code: 32304

MRP : 32000.00

The Cybershape Carbon CWT Truls Edition is a 5+2-ply blade based on CCF technology (Close Core Fibre), which means that the carbon-fibre layer is applied directly on top of the wood core. This gives you more control while you also benefit from the carbon-fibre speed. The lightweight, technologically advanced carbon fibre also gives the blade more speed without sacrificing balance.
