F-BP- BARBELL PAD

Code: 49220

MRP : 1970.00

COSCO[®]
SPORTS | FITNESS

Thanks to its considerable size, it protects the hips during butt building exercises and also protects the neck vertebrae when squatting.

It helps to support the barbell, preventing it from slipping and can lead to injuries during training. The Force USA 40 cm weight pad is perfect for making your workouts more efficient and comfortable. Constructed from commercial-grade vinyl with ripstop technology and thick, high-density foam padding. Velcro allows the pad to be securely attached to the bar and easily removed after use.
